Instructions: Please answer each question. Check "D/K" if you don't know, or otherwise lack sufficient knowledge of the Property to answer the question.

	PREVIOUS INVESTIGATIONS	
1.	Have any previous environmental investigations (e.g.- Phase I Environmental Site Assessment, soil/groundwater testing, radon testing, asbestos survey, tank closure/removal reports, etc.) been performed at the Property?	☒ Yes ☐ No ☐ D/K
2.	If yes, what concerns were indicated or recommendations made? *(please provide a copy of all previous environmental reports)* testing before Construction	
	PROPERTY USAGE	
3.	To the best of your knowledge, is the Property or any adjoining property currently occupied or formerly occupied for industrial purposes? If yes, please elaborate:	Property: ☐ Yes ☒ No ☐ D/K Adj. Property: ☐ Yes ☐ No ☐ D/K
4.	Is the property or any adjoining property currently used, or have they ever been used, as a gasoline filling station, dry cleaning facility, automotive service/repair shop, auto body repair shop, commercial printing facility, photo development laboratory shop, junkyard, landfill, or as a waste treatment, storage disposal, recycling or processing facility? If yes, please elaborate: Building at 451 Valley Rd was an auto repair	Property: ☒ Yes ☐ No ☐ D/K Adj. Property: ☐ Yes ☐ No ☐ D/K
5.	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries,, or any other waste materials been dumped above grade, buried and/or burned on the property?	☐ Yes ☒ No
	BULK STORAGE TANKS	
6.	Are there currently, or have there been previously, any registered or unregistered above ground or underground storage tanks located at the Property? *If YES, please provide number, size, age of tanks, permits, closure reports, regulatory agency correspondence, and related information.* Diesel fuel	Current Tanks: ☒ Yes ☐ No ☐ D/K Previous Tanks: ☐ Yes ☐ No ☐ D/K
7.	Are there currently, or have there been previously, any vent pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Current: ☐ Yes ☐ No ☒ D/K Previous: ☐ Yes ☐ No ☐ D/K
8.	Are there currently, or have there been previously, any leakage of hazardous substances or petroleum products from above ground or underground storage tank systems at the Property?	Current: ☐ Yes ☒ No ☐ D/K Previous: ☐ Yes ☐ No ☐ D/K

HILLMANN
CONSULTING

	SPILLS, RELEASES, WASTES	
9.	Are there currently, or have there been previously, any waste discharges on or adjacent to the property, other than storm water or into a municipal sanitary sewer system? If yes, please elaborate:	Current: ☐ Yes ☒ No ☐ D/K Previous: ☐ Yes ☐ No ☐ D/K
10.	Are there currently, or have there been previous, any septic systems, dry wells or leach fields on the property? If yes, please elaborate:	Current: ☐ Yes ☒ No ☐ D/K Previous: ☐ Yes ☐ No ☐ D/K
11.	Are there currently, or have there been previously, any flooring, drains or walls located within the facility that are, or have been, stained by substances (or, in the case of drains, used for) other than water or are emanating foul odors? If yes, please elaborate: Sewage back up	Current: ☒ Yes ☐ No ☐ D/K Previous: ☐ Yes ☐ No ☐ D/K
12.	Are there currently, or have there been previously, any spills or releases of hazardous substances or petroleum products within the building(s) or on the exterior of the Property?	Current: ☐ Yes ☐ No ☐ D/K Previous: ☐ Yes ☐ No ☐ D/K
13.	Has any non-native and/or contaminated fill material been deposited on the Property?	☐ Yes ☒ No ☐ D/K
14.	Have any current or former property occupants generated hazardous wastes or other wastes (such as waste oil, or medical wastes) that required non-conventional storage, handling and/or disposal methods? *If YES, please indicate type of waste and the name of the waste handling contractor:* _____	☒ Yes ☐ No ☐ D/K
	TRANSFORMERS/HYDRAULIC EQUIPMENT	
15.	Are any power transformers, capacitors or hydraulic equipment present at the Property? If yes, please elaborate:	☐ Yes ☐ No ☒ D/K
16.	If power transformers are present, who owns them? _____	☐ Yes ☐ No ☐ D/K
17.	If hydraulic equipment is present, indicate age of equipment and name/telephone # of service contactor:	☐ Yes ☐ No ☐ D/K
	REGULATORY DISCLOSURE	
18.	Have there been any environmental liens or governmental notification or involvement relating to past or current use or disposal of hazardous substances with respect to the property of any facility or structure located on the property?	☐ Yes ☐ No ☒ D/K

HILLMANN
CONSULTING

19.	If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system, or has the well been designated as contaminated by any government environmental/health agency? *(if not applicable, please check* NO*)*	☐ Yes ☒ No ☐ D/K
20.	Is there any environmental litigation, administrative action or cleanup action involving the property related to a release or threatened release of any hazardous substance or petroleum product?	☐ Yes ☒ No ☐ D/K
21.	Are you aware of testing of any environmental media (soil, groundwater, surface water, etc.) at the property which identified levels of contaminants in excess of regulatory standards and/or cleanup guidelines?	☐ Yes ☒ No ☐ D/K
	ENVIRONMENTAL/BUILDING CONDITIONS	
22.	Has asbestos testing ever been conducted at the Property? *If YES, please forward a copy of test results and/or survey reports:*	☒ Yes ☐ No ☐ D/K
23.	Are any asbestos containing materials present at the Property? If yes, please elaborate:	☒ Yes ☐ No ☐ D/K
24.	Has lead paint testing ever been conducted at the Property? *If YES, please forward a copy of test results.*	☐ Yes ☐ No ☒ D/K
25.	Is lead-based paint present at the Property? If yes, please elaborate:	☐ Yes ☐ No ☒ D/K
26.	Has radon testing ever been conducted at the Property? *If YES, please forward a copy of test results.*	☐ Yes ☐ No ☒ D/K
27.	Are there any problems with water intrusion, water damaged surfaces or excessive mold growth within the buildings? If yes, please elaborate:	☐ Yes ☒ No ☐ D/K

Advanced
GeoEnvironmental, Inc.

26 July 2016
AGE Project No. 16-3820

DRAFT

Mr. Michael Kissick
SunWest Engineering Constructors, Inc.
4780 Cheyenne Way
Chino, California 91710

Subject: **Soil Sampling During Piping Upgrade -**
PALOMAR MEDICAL CENTER
555 E. Valley Parkway, Escondido, California
SD-DEH File No. H114230

Dear Mr. Kissick:

Advanced GeoEnvironmental, Inc. (AGE) has prepared the enclosed report summarizing the collection of a soil sample during the removal of approximately 95 feet of diesel product lines at the PALOMAR MEDICAL CENTER, 555 E. Valley Parkway, Escondido, California 91012 (site).

1.0. SITE LOCATION AND DESCRIPTION

The site is situated in a mixed commercial and residential area of Escondido, California, immediately east of the intersection of East Valley Parkway and Valley Boulevard. A 10,000 gallon diesel underground storage tank (UST) is plumbed to a generator and boiler by approximately 97 feet of piping. The product lines are being upgraded due to a failure of a primary line into the secondary line. The UST, product lines and surrounding features are depicted on Figure 1 - *Site Plan*.

2.0. DEPTH TO GROUND WATER

AGE reviewed data from Geotracker to determine the depth to groundwater at nearby sites. According to Geotracker, groundwater was encountered at depths of 9 to 12 feet below surface grade, flowing to the northwest, at a property located 0.2 miles west of the site. The site is located approximately 15 to 20 feet higher in elevation than this property, suggesting that groundwater could range from approximately 25 to 35 feet below surface grade.

3335 East Miraloma Avenue, Suite 142 • Anaheim, CA 92806
Telephone (714) 529-0200 • Fax (714) 529-0203

3.0. SOIL SAMPLE COLLECTION AND ANALYSIS

On 22 July 2016, five samples were collected below the piping and two samples from the spoils piles (Figure 1). The sampling and sample locations were conducted under the direction of Mr. Ed Paredes of the County of San Diego – Department of Environmental Health (SD-DEH). The sample were collected by Mr. John Tran, Staff Geologist with AGE, working under the direct supervision of Mr. Robert Loeffler, California Professional Geologist No. 6709.

Sample P1-3, P2-3, P3-4, P4-3 and P5-2.5 (Figure 1) were collected from a minimum depth of 2 feet below the piping using a hand auger. The samples were collected by removing and compacting the soil from the hand auger bucket into a stainless steel 2" x 3" sleeve. The ends of the sleeve were covered with a Teflon sheets, capped and labeled. The sleeves were subsequently sealed with evidence tape by Mr. Paredes. The samples were stored in a chilled container.

Samples SP1 and SP2 were also collected from the two spoils piles by digging 1 foot into each pile (Figure 1) and driving a 2" x 3" sleeve into the pile. The samples were then covered with Teflon sheets, capped and labeled. These samples were placed in the chilled container.

The five piping samples were transported to Alpha Scientific Corporation (ASC), a California Department of Public Health-Certified laboratory, under SD-DEH chain-of-custody while the two spoils piles samples were transported under an AGE chain-fo-custody.

All piping and spoils pile samples were analyzed for total petroleum hydrocarbons as gasoline, diesel and oil ranges (TPH-g, TPH-d and TPH-o) in accordance with EPA method 8015-modified. Samples P3-4 and the spoils piles samples were also analyzed for benzene, toluene, ethylbenzene and xylenes (BTE&X) with fuel oxygenates, in accordance with EPA method 8260B.

5.0. FINDINGS

No staining was observed in the soil. Hydrocarbon odors were noted in sample P3-4 and SP1.

In the piping samples, TPH-g, TPH-d and TPH-o were only detected in sample P3-4 at 27.8 mg/kg, 830 mg/kg and 78.9 mg/kg, respectively. BTE&X and the fuel oxygenates (including MTBE) were not detected in this sample.

TPH-g, TPH-d and TPH-o were only detected in sample SP-1 at 12.1 mg/kg, 392 mg/kg and 35.2 mg/kg, respectively. BTE&X and the fuel oxygenates were not detected in either spoils pile sample.

The analytical results are summarized on Table 1. The analytical reports, QA/QC reports (ASC Job No. AE607079 and AE607080) and chain-of-custody forms are attached.

6.0. RECOMMENDATIONS

Based on field observations and the analytical results, there is evidence that a release had occurred in the area of the sample P3-4. A piping joint was present at this location. AGE recommends that this report be forwarded to the SD-DEH for review and further direction.

7.0. LIMITATIONS

Our professional services were performed using that degree of care and skill ordinarily exercised by environmental consultants practicing in this or similar localities. The findings were based solely upon analytical results provided by an independent laboratory. Evaluations of the subsurface conditions at the site have been made from a limited number of available data points (i.e. soil samples) and subsurface conditions may vary away from these data points. No other warranty, expressed or implied, is made as to the professional interpretations, opinions, and recommendations contained in this report.

If you have any questions or require further information, please contact our office at (714) 529-0200.

Sincerely,

***Advanced* GeoEnvironmental, Inc.**

LABORATORY REPORT

Alpha Scientific Corporation
Environmental Laboratories

07-26-2016

Mr. Robert Loeffler
Advanced GeoEnvironmental, Inc.
3335 E. Miraloma Ave., Suite 142
Anaheim, CA 92806

Project: Palomar Medical
Project Site: Not Specified
Sample Date: 07-21-2016
Lab Job No.: AE607080

Dear Mr. Loeffler:

Enclosed please find the analytical report for the sample(s) received by Alpha Scientific Corporation on 07-21-2016 and analyzed by the following EPA methods:

EPA 8015M (Total Petroleum Hydrocarbons)
EPA 8260B (BTEX & Oxygenates by GC/MS)

All analyses have met the QA/QC criteria of this laboratory.

The sample(s) arrived in good conditions (i.e., chilled, intact) and with a chain of custody record attached.

Alpha Scientific Corporation is a CA DHS certified laboratory (Certificate Number 2633). Thank you for giving us the opportunity to serve you. Please feel free to call me at (562) 809-8880 if our laboratory can be of further service to you.

Sincerely,

Roger Wang, Ph.D.
Laboratory Director

Environmental Laboratories

07-26-2016

Mr. Robert Loeffler
Advanced GeoEnvironmental, Inc.
3335 E. Miraloma Ave., Suite 142
Anaheim, CA 92806

Project: Palomar Medical
Project Site: Not Specified
Sample Date: 07-21-2016
Lab Job No.: AE607079

Dear Mr. Loeffler:

Enclosed please find the analytical report for the sample(s) received by Alpha Scientific Corporation on 07-21-2016 and analyzed by the following EPA methods:

EPA 8015M (Total Petroleum Hydrocarbons)
EPA 8260B (BTEX & Oxygenates by GC/MS)

All analyses have met the QA/QC criteria of this laboratory.

The sample(s) arrived in good conditions (i.e., chilled, intact) and with a chain of custody record attached.

Alpha Scientific Corporation is a CA DHS certified laboratory (Certificate Number 2633). Thank you for giving us the opportunity to serve you. Please feel free to call me at (562) 809-8880 if our laboratory can be of further service to you.

Sincerely,

Roger Wang, Ph.D.
Laboratory Director

Enclosures

This cover letter is an integral part of this analytical report.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 02/07/2017 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
BENTON BURN DUMP	END OF STILL WATER G	SW 1/8 - 1/4 (0.234 mi.)	76	227

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2017 has revealed that there are 8 ENVIROSTOR sites within approximately 1 mile of the target property.

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 34 LUST sites within approximately 0.5 miles of the target property.

SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the SLIC list, as provided by EDR, has revealed that there are 7 SLIC sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SAN DIEGO CONS GAS A	S. SPRUCE AND W 3RD	SW 1/2 - 1 (0.952 mi.)	117	334

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 16 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 6 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site History:	On May 27, 2008, the Department of Environmental Health (DEH) received a Voluntary Assistance Program application requesting the review of assessment and mitigation activities at the above site. The site assessment and mitigation work was performed to redevelop the land from commercial to residential use. The property consists of approximately 160 acres that will be developed for 340 single family homes. The property was an operating citrus farm for approximately 95 years. Chemicals used on the former citrus farm consisted of pesticides, herbicides, fungicides, and fertilizers. Additionally, diesel fuel and unleaded gasoline was stored in as many as thirteen Aboveground Storage Tanks (ASTs) during the years of operation. Between 2005 and 2007, seven ASTs were removed from the site. Prior

EUREKA RANCH, FORMER SPEITH & WOHLFORD (Continued) **S109118207**

Phase I and Phase II investigations indicated environmental impacts that included diesel and heavy hydrocarbons contamination with a small amount of pesticide impacts. These impacted areas were divided into sixteen Areas of Concern (AOC). Total Petroleum Hyrdocarbons as diesel (TPHd) in soil ranged from below laboratory reporting limits (ND) to 142,000 milligrams per kilogram (mg/kg). Total Petroleum Hyrdocarbons as gasoline (TPHg) in soil ranged from ND to 2,000 mg/kg. Concentrations of benzene ranged from ND to 0.17 mg/kg, toluene ranged from ND to 0.17 mg/kg, and napthalene ranged from ND to 113 mg/kg. All other fuel constituents were below laboratory detection limits. Approximately, 31,344 tons of hydrocarbon impacted soil was excavated and disposed. Areas excavated during remedial activities were replaced with visually inspected soil from non-impacted areas of the site. Confirmation samples were collected from the bottom and sidewalls of the excavations. Results indicate that approximately 238 cubic yards of hydrocarbon impacted soil remain onsite in five AOCs. According to the consultant, due to the depth of residual contamination, humans are not anticipated to come in contact with remaining impacted soils. Concentrations in soil associated with pesticides were detected in AOC 3 and AOC 8. However, only cholordane (AOC-3) was detected at a concentration greater than the Preliminary Remediation Goal for residential use. Approximately 600 tons of pesticide impacted soil from both areas were excavated and properly disposed. An arsenic study was conducted to determine if concentrations were naturally occurring or the result of past farming activities. Samples collected in areas not historically farmed, indicated arsenic concentrations to be naturally occurring. Based on comparison sampling and analysis, no further investigation was warranted. The site is located in a basin designated for beneficial municipal, agricultural and industrial supply use. Depth to groundwater in three onsite agricultural wells ranged from 14 feet below grade (fbg) on the west side of the property to 48 fbg on the east side of the property. Groundwater flow direction is towards the west-southwest. During the investigation, free product was discovered in AOC-7C. A series of open boreholes were advanced onsite to investigate groundwater conditions. Additionally, groundwater samples were also collected from the onsite agricultural wells. Concentrations of TPHd in groundwater ranged from ND to 2,100 micrograms per liter. All other fuel related analytes were ND for all groundwater samples. During excavation activities, approximately 57,400 gallons of hydrocarbon impacted groundwater was removed and properly disposed. Because of residual hydrocarbon impacted soil left in place, a vapor risk assessment was performed to evaluate the potential onsite carcinogenic risk to future occupants of the site. Both qualitative and quantitative evaluations were performed to evaluate potential risks. The qualitative model was based on residual soil hydrocarbon impacts. Results of this model indicated a maximum risk of 6.38 x 10-8. Quantitative soil vapor samples were collected two years following backfilling the excavation. Vapor risk modeling utilizing both the Site Assessment & Mitigation and the Department of Toxic Substance Control/Johnson & Ettinger vapor intrusion models. Results indicate a maximum risk of 1.1 x 10-9. Both models indicate a less than one in one million excess cancer risk. The consultant concludes that the areas of impacts at the site have been fully remediated or mitigated to the extent practical and are safe for human occupancy and recommends closure of this case. DEH concurs with their conclusion and recommendation.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number: 9UT2655
LOC Case Number: H03527-001
File Location: Local Agency
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: In January 1994, three underground storage tanks (USTs) containing gasoline and diesel were removed. Based on samples collected at the time of the tank removal, the case was opened. The site is underlain by alluvial materials extending to depths ranging from 10 to 30 feet across the site. Beneath the alluvium is decomposed granitic rock. The impacted groundwater was identified to be in the alluvial aquifer. Groundwater flow is to the west-northwest at a gradient of 0.01 to 0.003. The site investigation was performed between 1994 and 2000 and included the installation of nine exploratory borings, nine groundwater monitoring wells, and four temporary soil vapor probes in

ACTION CAR WASH (Continued) **U001571382**

addition to a number of excavation samples that were collected during the tank removal in 1994. Soil impacts are limited to the site and are located in the area of the former USTs, the dispenser islands and extend beneath the western side of the on-site building. Due to the potential vapor risk to the occupants of the on-site building, a limited health risk evaluation was competed. This evaluation indicated there was no risk. There is an estimated 720 cubic-yards (cu-yd) of residual impacted soil remaining on-site above 100 mg/kg. Dissolved impacts of concern included Benzene, MTBE and TBA. The dissolved impacts have migrated off-site an estimated 30 to 40 feet to the west and northwest. In December 2000, a Corrective Action Plan (CAP) was approved which proposed to use soil excavation as the primary remedial action to remove residual soil impacts in and around the groundwater table. The State Cleanup fund denied funding for this alternative in 2002. Due to the denial of funding, the Responsible Party had their consultant reevaluate the remedial alternatives for the site. In February of 2005, feasibility testing for dual phase extraction (DPE) was completed and an addendum to the CAP was approved in June 2007. The approved CAP proposed to use DPE followed by natural attenuation as the primary remedial action to remove residual soil impacts in and around the groundwater table and to reduce the residual groundwater impacts. DPE implementation took place in two separate 30 days events (February 16, 2010 to March 17, 2010 and April 28, 2010 to May 29, 2010). Following the completion of the second event, four quarterly groundwater monitoring events were completed to evaluate the effectiveness of the remedial action. Dissolved concentrations were significantly reduced by this remedial action. The trend analysis completed by SCS engineers (SCS) estimated dissolved benzene and TBA will drop below their maximum concentration limit (MCL) and notification levels, respectively within 17 years. MTBE is currently below its primary MCL in all wells and exceeds the secondary MCL in two wells. MTBE should be below its secondary MCL within the 17 years. Based on the post remedial monitoring and the trend analysis, DEH concurs that natural attenuation will bring the groundwater contaminant levels to below regulatory levels within a reasonable timeframe and closure of the case is appropriate at this time.

Local Agency:	SAN DIEGO COUNTY LOP
RB Case Number:	Not reported
LOC Case Number:	H05198-001
File Location:	Local Agency
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	A gasoline station operated on the northeast corner of East Grand Avenue and Juniper Street in Escondido, California, from 1959 to 1979. The station was reportedly demolished in 1980 and the underground storage tank (UST) system was removed. The property has remained undeveloped and unpaved since that time. Although the property owner initially applied to the DEH Voluntary Assistance Program in 1998 based on the findings of an environmental site assessment, the case was subsequently moved to the Local Oversight Program. A Notice of Responsibility was issued by DEH on January 23, 2002. A soil gas survey was performed at the site in September 1998. Twelve soil vapor samples were collected from 12 locations at a depth of 10 feet below grade. The sampling locations were near the former tank pit in the southeastern half of the property. Total petroleum hydrocarbons (TPH) as gasoline was detected in 10 of the samples and at least one of the aromatic hydrocarbons [benzene, toluene, ethylbenzene, and xylenes (BTEX)] were detected in each of these samples. Methyl-tert-butyl ether (MTBE), a fuel oxygenate, was detected in two of the samples. A monitoring well was installed near the former UST pit in December 2000. Analytical results for soil samples collected from the well boring indicated detection of TPH as gasoline to a depth of at least 25 feet below ground surface (bgs). Groundwater was encountered in the boring. TPH as gasoline and BTEX were detected in the groundwater sample collected from the monitoring well following its installation and development. A total of 11 borings were advanced during site assessments performed in 2002 and 2003 to further delineate the lateral and vertical extents of gasoline impacts to soil. Discrete-depth groundwater samples were collected from seven of the borings. Four off-site and four on-site monitoring wells were installed during site assessments performed in 2002, 2007, and 2009. DEH approved a second revised Corrective Action Plan (CAP) for the site on April 29, 2014. The consultant calculated the volume of impacted soil with a gasoline concentration greater than 100 mg/kg at the site to be approximately 6,737 cubic yards. The estimated mass of gasoline in soil was calculated to be 4,429 pounds (689 gallons) based on soil data obtained during the 2000-2003 timeframe. As indicated in the CAP, soil impacts and the dissolved gasoline plume underlie the southeast portion of the property and extend beneath both East Grand Avenue and Juniper Street, as well as beneath the parcel immediately to the northwest. However, trend analyses for dissolved benzene indicate decreasing concentrations at the plume margins. The consultant estimates that benzene concentrations will fall below its Maximum Contaminant Level (MCL) in 50 years. Analytical results for water quality parameters indicated that petroleum hydrocarbon concentrations in groundwater are being reduced by manganese, sulfate, and iron. Based on the age of the release, the decreasing concentrations of volatile constituents in groundwater, the lack of human health risk, and the absence of drinking water supply wells within one mile of the site, the consultant has recommended no further action and case closure. DEH concurs with these recommendations.

FINDS:

Registry ID: 110002679165

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	From 1921 to 1971 the site was a service station, last operated by Unocal. In 1974, the property was redeveloped and currently is the site of a bank. Site assessment work began after discovery of a release on an adjacent property. The groundwater gradient is to the north. Free product is still found in several on-site wells. Site assessment is not complete.

Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	Three underground storage tanks (USTs) were discovered during street improvement activities at the northeast corner of North Maple and West Grand Streets in Escondido in December 1988. The riveted USTs were oriented east-west and were located in the City of Escondido right-of-way and extended into a parking lot adjoining the sidewalk on North Maple Street. The northernmost UST had a capacity of approximately 230 gallons, while the middle and southernmost tanks has capacities of 550 and 750 gallons, respectively. A service station had formerly occupied the site, which was originally addressed as 164 West Grand Avenue. The service station operated from approximately 1927 through at least 1949. Dispenser pumps were still visible on aerial photos near the northeast corner of North Maple Street and West Grand until 1968. Samples of the tank contents were collected on December 5, 1988, as witnessed by a DEH inspector. Analytical results for the samples indicated a maximum concentration of total petroleum hydrocarbons (TPH) as gasoline as 880 milligrams per liter (mg/l). The maximum detected concentrations of the gasoline constituents benzene, toluene, ethylbenzene, and xylene (BTEX) were detected in the middle and southernmost tanks, with BTEX concentrations were reported as 110 and 218 mg/l, respectively. The volatile organic compound (VOC) 1,2-dichloroethane was detected in the contents of the southernmost tank at a concentration of 1.2 mg/l. The semi-VOCs naphthalene, methylnaphthalene, phenol, and 2-methylphenol were also detected in the contents of the tanks. The three USTs were removed on January 24, 1990. During the removal, strong odors were noted as emanating from the excavation and stained soil was noted. Holes were observed in one or more of the USTs. However, TPH and BTES were not detected in a soil sample subsequently collected two feet beneath the tank excavation at a depth of 8 feet below grade. A second release was reported for the site in March 1993 when a fourth UST with an estimated 800-gallon capacity was removed from beneath the sidewalk along the east side of North Maple Street. Hydrocarbon odors and soil staining were noted by the DEH inspector. Five groundwater monitoring wells were installed at the site. Phase-separated hydrocarbons (PSH) were initially detected in two of wells, but were not present during well monitoring and sampling rounds performed from 2001 through 2007. In the 1990s, the maximum

CITY OF ESCONDIDO (Continued) **S100733702**

detected thickness of the PSH layer was 0.82 feet in one of the wells and was observed as a sheen in the other well. Although dissolved hydrocarbons were detected as degraded gasoline, BTEX and methyl-tert-butyl ether (MTBE) were not detected in groundwater samples. Hydrocarbon impacts to soil were primarily observed at the capillary fringe, located at a depth of approximately 11 feet below grade, and extend north and eastward beneath the adjoining parking lot. The consultant estimated that the volume of hydrocarbon-impacted soil (i.e., soil with TPH concentrations greater than 100 milligrams per kilogram) left in place was 621 cubic yards. The initial release case for the site (#H20578-001) was consolidated with the second release case (#H20578-002) by DEH on April 28, 2011. Due to the intermittent frequency of groundwater monitoring and sampling at the site in the past, DEH required four quarters of consecutive monitoring and sampling and preparation of a Corrective Action Plan (CAP) in order to consider the site for closure. The CAP recommended remediation by natural attenuation and was approved by DEH on June 26, 2012. Groundwater analytical data presented in the CAP indicate that the dissolved gasoline plume is stable and that benzene, toluene, and ethylbenzene are no longer detected in groundwater samples. Xylene was detected in one well sample during the most recent monitoring and sampling round in November 2011 at a concentration of 0.012 mg/l. Due to the lack of detection of PSH overlying groundwater beneath the site since 2001, the stability of the dissolved gasoline contaminant plume and the reduction of BTEX and fuel oxygenates to non-detect concentrations, and lack of human health risk, the consultant (EnviroApplications, Inc.) has recommended no further action at the site and case closure. DEH concurs with these recommendations.

Site History:	Three underground storage tanks (USTs) were discovered during street improvement activities at the northeast corner of Maple and Grand Streets in Escondido in December 1989. The USTs were located in the public right-of-way in a parking lot adjoining the sidewalk on Maple Street. Samples of the tank contents were collected on December 5, 1989, as witnessed by a DEH inspector. Analytical results for the samples indicated the presence of degraded gasoline, primarily as naphthalene, methylnaphthalene, phenol, and 2-methylphenol. The volatile organic compound (VOC) 1,2-dichloroethane was also detected at a maximum concentration of 1.2 milligrams per liter. The USTs were removed on January 24, 1990. During the removal, strong odors were noted as emanating from the excavation and stained soil was noted in

CITY OF ESCONDIDO (Continued) **S100733702**

the excavation. Holes were observed in the two of the USTs. A second release was reported for the site in March 1993 when a fourth UST was removed from beneath the sidewalk. Five groundwater monitoring wells were installed at the site. Phase-separated hydrocarbons (PSH) were initially detected in two of wells, but were not present during well monitoring and sampling rounds performed from 2001 through 2007. In the 1990s, the maximum detected thickness of the PSH layer was 0.82 feet in one of the wells and present only as a sheen in the other well. Although dissolved hydrocarbons were detected as degraded gasoline, BTEX and fuel oxygenates were not detected in groundwater. Hydrocarbon impacts to soil were primarily observed at the capillary fringe. The consultant estimated that the volume of hydrocarbon-impacted soil (i.e., soil with TPH concentrations greater than 100 milligrams per kilogram) left in place was 621 cubic yards. Preparation of a Corrective Action Plan (CAP) is required for the site due to its location in a groundwater basin with beneficial uses and because PSH was formerly detected overlying groundwater. This case (H26578-001) was administratively consolidated into H26578-002 on 1/22/10. Please see that case number for additional information.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/05/2017

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing
A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

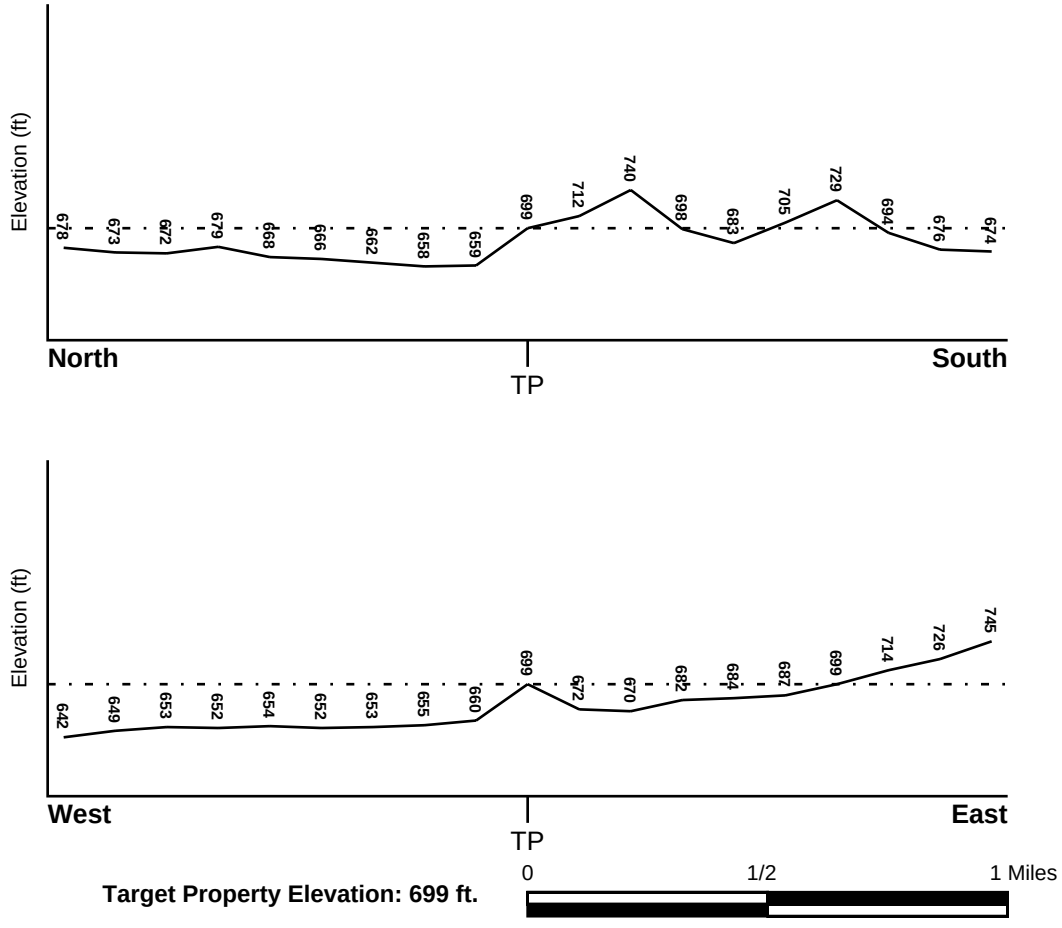
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

VALLEY CENTER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SW
Site Name:	Chatham Bros
Site EPA ID Number:	CAD990663361
Groundwater Flow Direction:	Southeast
Measured Depth to Water:	0.5 foot.
Hydraulic Connection:	Information about the hydraulic connection between aquifers under the site is not available.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

2	1/2 - 1 Mile SW	Not Reported
3	1/2 - 1 Mile West	W
6	1/2 - 1 Mile SW	S

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Mesozoic
System:	Cretaceous
Series:	Cretaceous granitic rocks
Code:	Kg *(decoded above as Era, System & Series)*

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: FALLBROOK

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6.5 Min: 6.1
2	5 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 7.3 Min: 6.1
3	11 inches	27 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
4	27 inches	46 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 7.3 Min: 6.1
5	46 inches	51 inches	weathered bedrock	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: PLACENTIA

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	12 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6.5 Min: 5.6

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	12 inches	33 inches	sandy clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 8.4 Min: 7.9
3	33 inches	62 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
