Subject Fire Hazard Safety Zones

Message My question is why my property at 2448 Fallbrook Place, Esc is in the Very High fire zone and my neighbors on the same street are Moderate. I tried to understand how it is determined but cannot find an answer. I object to this because that part of the street has more open grass land than we do. The website said to leave a comment with the local government. However, I cannot figure out who I am suppose to leave it with. If you know, would you please forward this to that person or department. Thank you. (Moderate zone is only 1500 feet away from my home)

Comment The map needs more street names for clarity. Zillow.com also provides this information

Comment

I have a great concern for the trees below my home at the Diablo Mobilehome Park that over a hundred foot tall, that would send embers directly to my home should anyone of them catch on fire.

Comment I would push back on where the map skirts a property and barely puts it into a category. Even for moderate, I know the state thinks insurance won't take this into consideration, but they will. Take out the properties that are only partially in a category; it's confusing otherwise!

Comment Is there a version of this map anywhere that provides streets?
Its hard to pin down an exact location with this one

Comment Thank you so much for this information and opportunity to comment. I would so appreciate a few more landmarks to better locate and understand this much appreciated map. I live near Reidy Creek Golf Course.
